Lichtschilf

Lichtschilf

The light art object Lichtschilf is setting a decorative lighting accent into effect for exterior and interior spaces. The cattails shape are related to nature and illuminated with white shining LEDs to provide a pleasant atmosphere. Lichtschilf consists of nine randomly arranged glowing cattails. The rods' height varies between 1200 and 1940 millimeters. Modern, high-performance LEDs ensure low power consumption. Lichtschilf can be customised individually and is available in a range of dimensions and light colours.

Perhaps Lichtschilf enriches your garden in future.
